## SOLUTIONS

1. (a)

According to the question figure, in outer side of figure the point moved in other side and two cross is add and inner figure point and cross moved to other side. So, option (a) is correct.
2. (c)

According to the question, the symbol is moved one step clockwise. So, option (c) is correct.
3. (d)

According to the question, the symbol is moved one step clockwise and next figure symbol is moved one step clockwise. So, option (d) is correct.
4. (d)

According to the question, the arrow is moved $45^{\circ}$ anticlockwise and arrow direction is changed, and $\square$ is moved one step anticlockwise and two step anticlockwise. So, option (d) is correct.
5. (c)

According to the question figure, circle and arrow moved one step anticlockwise and triangle moved one step clockwise and then reverse. So, option (c) is correct.
6. (d)

According to the question figure, rectangle moved 2 steps anticlockwise and change direction. So, option (d) is correct.
7. (a)

According to the question figure, $\square$ and $\Delta$ change their place step by step and other three symbol moved one step clockwise. So, option (a) is correct.
8. (d)

According to the question figure, dark part moved two step anticlockwise, $p \longrightarrow$ moved one step anticlockwise and reverse, circle moved one step. So, option (d) is correct.
9. (b)

According to the question figure, arrow moved $135^{\circ}$ clockwise. So, option (b) is correct.
10. (a)

According to the question figure, S moved 2 step and one step and then moved at bottom. So, option (a) is correct.
11. (a)

According to the question figure, $\qquad$ moved first two step and next one step anticlockwise, $\longrightarrow$ moved first two step and next one step clockwise. So, option (a) is correct.
12. (c)

According to the question figure, fist symbol moved at last and another symbol moved one step above. So, option (c) is correct.
13. (b)

According to the question figure, the figure first moved $45^{\circ}$ anticlockwise and their end is interchanged, and the second moved $135^{\circ}$ clockwise their end is interchanged. So option (b) is correct.
14. (c)

In given question figure (IV) is removed and then, figure I to all figure in a pattern. So option (c) is correct.
15. (d)

According to the question figure, moved one step clockwise, and arrows moved $90^{\circ}$ anticlockwise and dark. So, option (d) is correct.
16. (a)

According to the question, the triangle and square moved $45^{\circ}$ anticlockwise and $\boldsymbol{\nabla}$ is moved $45^{\circ}$ clockwise. So, option (a) is correct.
17. (a)

According to the question figure, first one arrow is add and reverse, next one line add and arrows are reverse. So, option (a) is correct.
18. (a)

According to the question figure, figure moved $135^{\circ}$ anticlockwise. So, option (a) is correct.
19. (d)

According to the question figure, all symbol moved one step clockwise and symbol change their direction. In triangle, one side is added. So, option (d) is correct.
20.
(b)

According to the question figure, $\longrightarrow$ moved one step clockwise and $\longrightarrow$ moved two step clockwise. So, option (b) is correct.
21. (d)

According to the question figure, line move one step clockwise and $\uparrow$ move $45^{\circ}$ anticlockwise. So, option (d) is correct.
22. (d)

According to the question figure, $\triangle$ moved one step clockwise and remove one side dark part of square move one step, two step, three step clockwise. So, option (d) is correct.
23. (a)

According to the question figure, $\Delta$ moved one step clockwise and it also moved $90^{\circ}$. So, option (a) is correct.
24. (b)

According to the question figure, all symbol moved one step clockwise. So, option (b) is correct.
25. (d)

According to the question figure, circle moved $45^{\circ}$ anticlockwise and square moved one step anticlockwise. So, option (d) is correct.
26. (d)

According to the question figure, all symbol moved one step clockwise. So, option (d) is correct.
27. (c)

According to the question figure, circle moved one step anticlockwise, square moved one step anticlockwise and inside line is change. So, option (c) is correct.
28. (d)

According to the question figure, right symbol changed and left symbol remove by right symbol. So, option (d) is correct.
29. (c)

According to the question figure, circle moved two step clockwise. So, option (c) is correct.
30. (a)

According to the question figure, circle moved one step clockwise. So, option (a) is correct.
31. (a)

According to the question figure, paper fold three times. So, option (a) is correct.
32. (c)

According to the question figure, triangle moved opposite corner. So, option (c) is correct.
33. (c)

According to the question figure, in figure one line add. So, option (c) is correct.
34. (a)

According to the question figure, paper fold three times, circle is four and square is four. So, option (a) is correct.
35. (b)

According to the question figure, the middle line moved $90^{\circ}$ clockwise. So, option (b) is correct.
36. (a)

According to the question figure, $\longrightarrow$ moved one step down and change direction and another symbol moved one step, two step, three step anticlockwise. So, option (a) is correct.
37. (d)

According to the question figure, left down corner symbol moved to right down corner and Right up corner symbol moved to left down corner. So, option (d) is correct.
38. (a)

According to the question figure, all arrows moved one step anticlockwise, dark arrow moved two step and rectangle dark part moved opposite. So, option (a) is correct.
39. (d)

According to the question figure, $0, \Delta$,$\rangle , moved one$ step clockwise, and $\square, ~ \bigvee$ replace. So, option (d) is correct.
40. (b)

According to the question figure, square moved one step clockwise and fist blank and next dark. In circle dark part moved one step. So, option (b) is correct.
41. (d)

According to the question figure, circle and triangle replace each other and circle moved $90^{\circ}$. So, option (d) is correct.
42. (a)

According to the question figure, Circle moved $90^{\circ}$ anticlockwise. So, option (a) is correct.
43. (c)

According to the question figure, symbol is added one more. So, option (c) is correct.
44. (b)

According to the question figure, In figure arrow (>) is add one more. So, option (b) is correct.
45. (c)

According to the question figure, all symbol are moved one step clockwise and three symbol are reverse. So, option (c) is correct.

## SOLUTION

1. (a)

According to the question figure, $\Delta$ and $*$ moved one step clockwise and •, o moved one step anticlockwise. So, option (a) is correct.
2. (b)

According to the question figure, the figure moved $90^{\circ}$ clockwise and $\Delta$ changed their directions. So, option (b) is correct.
3. (c)

According to the question figure, bottom arrow moved $90^{\circ}$ clockwise. So, option (c) is correct.
4. (b)

According to the question figure, two lines are added at the end of line in opposite direction. So, option (b) is correct.
5. (d)

According to the question figure, bottom triangle moved $90^{\circ}$ clockwise. So, option (d) is correct.
6. (d)

According to the question figure, one arrow is added and its direction in opposite. So, option (d) is correct.
7. (b)

According to the question figure, two circles are added. So, option (b) is correct.
8. (d)

According to the question figure, the symbol moved one step left side and dark shape moved left side. So, option (d) is correct.
9. (a)

According to the question figure, one line is removed. So, option (a) is correct.

1. (b)

According to the question figure, all symbol moved one step clockwise and change in opposite direction. So, option (b) is correct.
2.

According to the question figure, one line added. So, option (d) is correct.
3. (a)

According to the question figure, all symbol make a line and this line moved $45^{\circ}$ clockwise and last symbol moved at first. So, option (a) is correct.
4. (c)

According to the question figure, the dark part moved to IInd next figure. So, option (c) is correct.

20 ■ SSC Reasoning

According to the question figure, all symbol moved one step clockwise and change their direction. So, option (d) is correct.
6. (d)

According to the question figure, one triangle is added and \& is moved one step clockwise. So, option (d) is correct.
7. (c)

According to the question figure, figure moved $45^{\circ}$ clockwise. So, option (c) is correct.
8. (a)

According to the question figure, right corner symbol moved to left corner symbol, down symbol moved to bottom. So, option (a) is correct.
9. (c)
